

A large grid of yellow graph paper with a grid of lines. The grid consists of 20 columns and 30 rows of small squares. The lines are thin and black, and the background is a light yellow color. The grid is positioned on the left side of the page, with a white margin on the right.

A large grid of graph paper with 30 columns and 40 rows, used for drawing or calculations. The grid is composed of small squares, each approximately 1 cm by 1 cm in size. The grid is filled with a light gray or yellowish color, and the lines are thin and black.

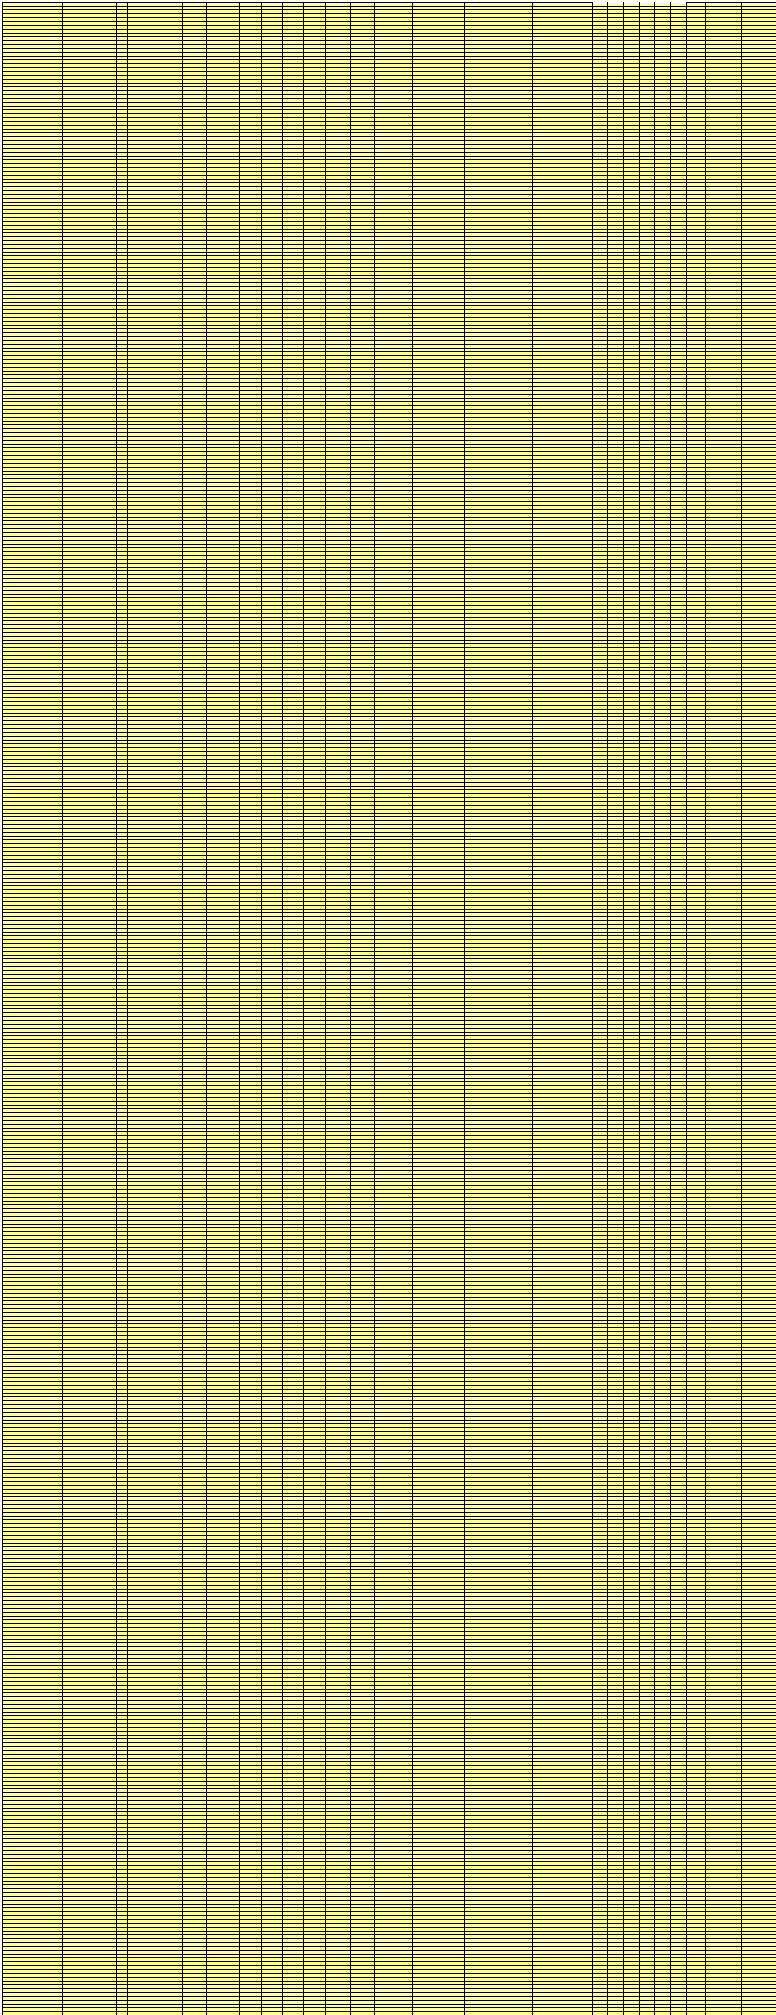

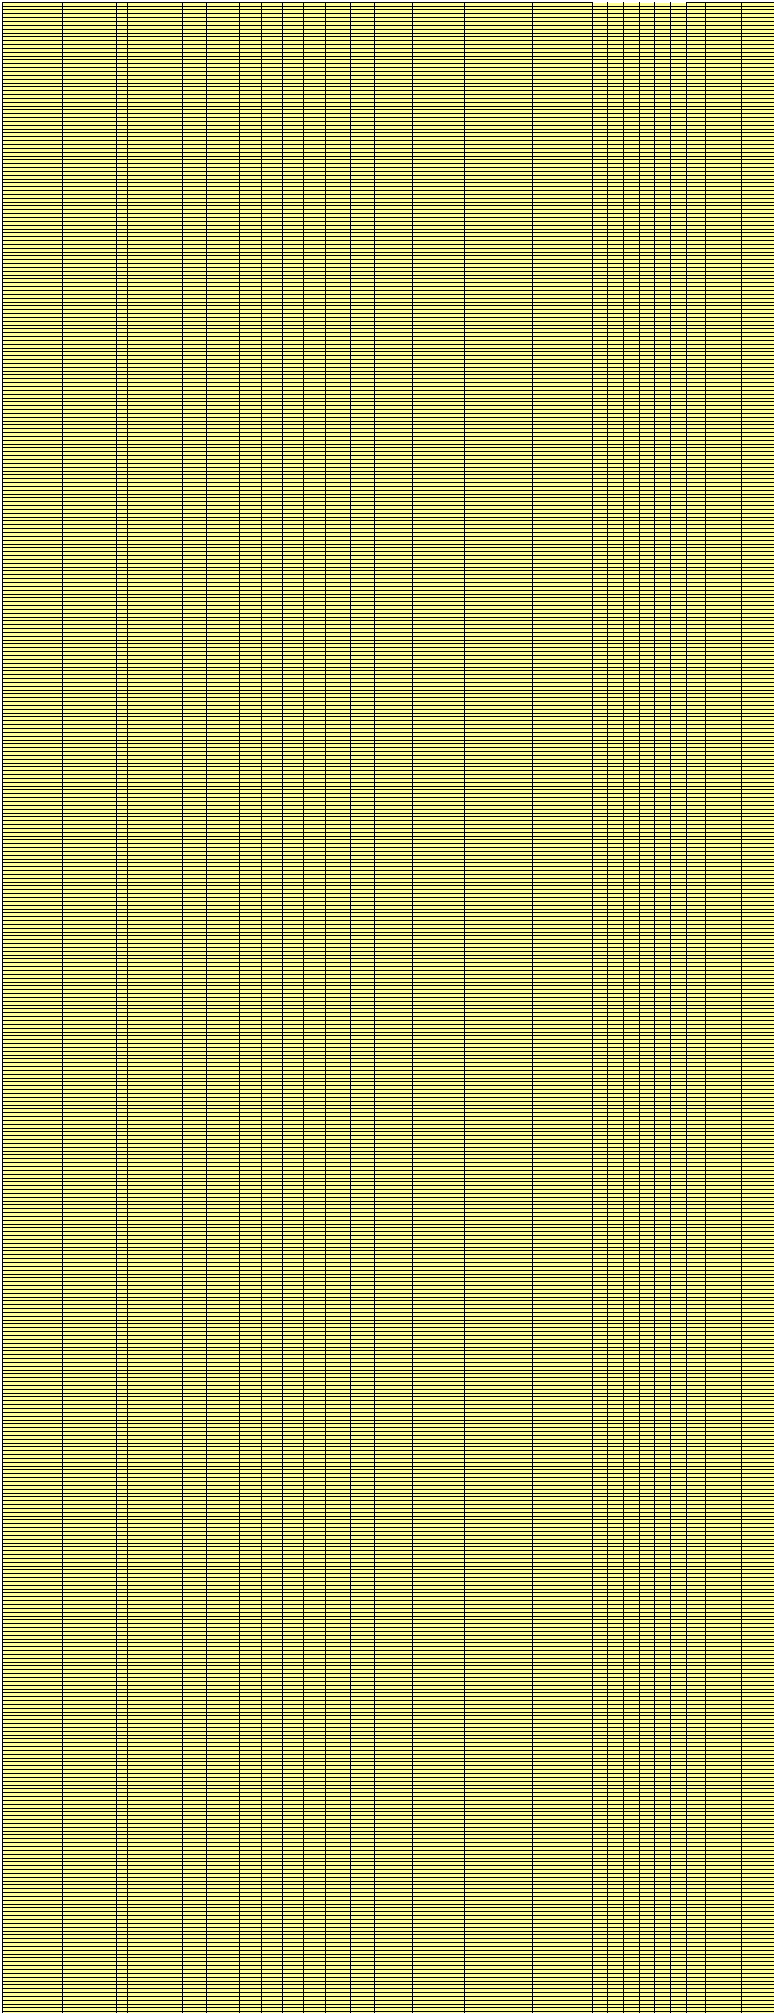

A large grid of yellow graph paper with a grid of thin black lines. The grid is composed of 20 columns and 40 rows of small squares. The grid is positioned on the left side of the page, leaving a wide white margin on the right.

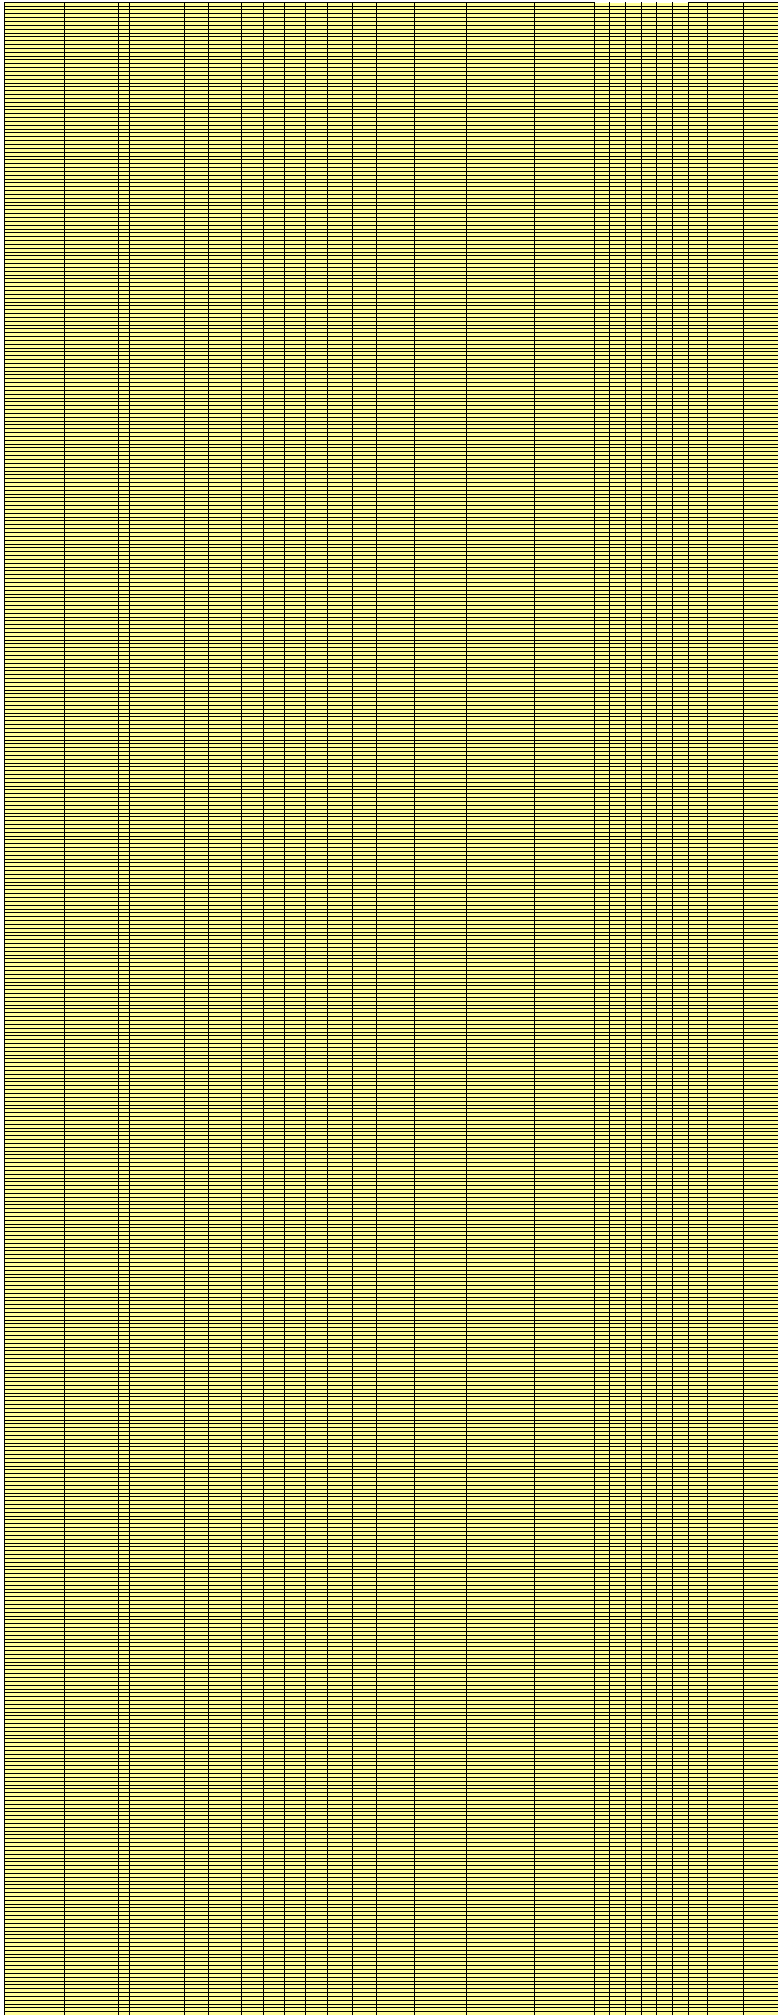

A large rectangular area filled with a fine grid of yellow lines, resembling graph paper. The grid consists of approximately 25 columns and 100 rows of small squares. The lines are thin and black, creating a uniform pattern across the entire area.

The image displays a full-page grid of yellow graph paper, which is a standard format for probability worksheets. The grid is composed of numerous small squares, providing a space for students to draw sample spaces, calculate probabilities, or create tree diagrams. The grid is rectangular and covers most of the page, leaving margins for text and headers.

The image shows a large rectangular area filled with a yellow grid pattern, resembling graph paper. The grid consists of small, uniform squares. The grid is positioned on the left side of the page, leaving a significant white margin on the right.
